## Rotating and tilting tables

## RU-4 / RU-M / RU-4M

The tilt and turn tables are universally applicable for sash and frame assembly and for glazing.

RU-4 rotary tilt table

### Facilities:

- Manual tilting movement via foot lever (RU-M, RU-4-M)
- Tilting movement pneumatically via foot valve (only for RU-4)
- Rotary movement can be locked with foot brake.
- Removable and height-adjustable mounting bar
- Tool tray
- Support surface optionally covered with felt, brush strips or sliding strips
- Support surface adjustable, with plug-in or swivelling extensions.
- Weatherboard recess
- 2 support feet, foldable (RU-4, RU-4-M)

### Optional accessories:

- Roller conveyor instead of installation strip
- 3 storage boxes, each with 2 compartments (not for RU-M)
- Hydraulic lifting device with foot pump
- 2 transport rollers
- 4 swivel castors, 2 of which have a locking mechanism
- 2 adjustable clamping devices for frames (RU-4, RU-4-M)
