

Glazing Bead Saw

RU-GL-45°

Developed for the paired cutting of glazing beads

The RU-GL glazing bead saw is mounted to a working table equipped with a gauging and clamping device. The cutting length is between 230mm and 2380mm. The left saw is on a fixed position while the right saw is manual moveable on a guardrail. Two hand safety control while cutting. Working table surface is covered with felt. Working table length with board 3300mm, table height adjustable 800mm - 1000mm.

Technical Data:

Type

RU-GL-45° Platform 3000 mm x 1400 mm
Work holding device for measuring gauge
Measuring gauge with a measuring length approx. 2450 mm
Measuring gauge with a measuring length approx. 1430 mm
Plates for special glazing beads with notches
Digital display
