

## Door Assembly Table 180° Turn Over Device For Doors

**RU-HVKT**

The RU-HVKT, is developed to turn doors over a v-shaped folding-mechanism. The working platform is pneumatically in the middle, v-shaped tilt able, for the horizontal turn-over of the door. Further the table is equipped with a vertical tilting device.

As accessory we offer the RU-REV a 90° door frame hang-up device, in combination with 4 hoist cylinder to assemble packaging boards to the door frame.
