

Assembly Tilt Table For Sliding Patio Doors

RU-MK-HS 2,4-6
RU-MK-HS 3,0-7
RU-MK-HS 3,8-10

The assembly table for sliding patio doors is consisting of one solid base frame with working platform and 2 extensions to the left and right. The working surfaces are covered with felt. The platforms are extendable in the height from 2100 mm- 3200 mm and in the length in the largest version from 3000mm – 10000 mm. The tilting movement is controlled through a foot valve from horizontal to 90° vertical. The standard version has steel plates as a bottom contact surface distance to the floor adjustable 100 mm – 150 mm. Bearing capacity of the table 400 kg.

Accessory:

- Second foot valve
- Steel rollers instead of steel plates
- Clamping cylinders
- Hydro pneumatic cushion
