## Assembly table extendable on rails

RU-MSA

The solution for special construction: narrow platform with tool storage and driving mechanism.

### benefits:

- The narrow design of the base frame allows easy access to the elements from all sides.
- Large adjustment range of the support surface by pulling out the diamond-shaped supports.
- Tools and small parts are always within reach on the shelf on the assembly tables.
- Support bars can be covered with rubber, brushes, sliding strips or felt.
- No cable clutter when using the equipment carriers. The machines are always within reach at the place of use.

### Facilities:

- Work surface covered with profiled rubber.
- Rhomboid-shaped supports arranged around the edge for storing profiles lengthwise.
- Height adjustable from 900 to 1100 mm.

### accessories:

- Support feet for pull-outs with increased load requirements.
- Shelf at top and bottom 600 x 1200 mm.
- Transport device with flanged castors and parking brake; guide rails as required.
- Transport device with 4 swivel castors, with swivel and transport brake.
- Transport rollers for moving the tables to the start of the rails.
- Work surface covered with sliding strips (optional).
- Work surface covered with brushes (optional).
- Work surface covered with felt.
- Holder for screwdriver or drill mounted on the table.
