Glazing hangers

RU-VG

Glazing sling with vacuum suction cups for transporting windows and doors. Can be used in conjunction with crane runway and crane.

Function, features and accessories:

- Gentle transport of windows and doors by holding onto the inserted glass pane.
- Lifting of windows/doors placed on a roller conveyor.
- Even multi-sash windows can be transported in this way.
- Vacuum suction cups/suction pads adjustable in width depending on type.
- Rotating device with 90° locking mechanism.
- With vacuum generator for fast suction
